

## **Bug Report**

Title: Test Case test\_orangesRotting Doesn't Clear Text Area

### **Bug Description:**

#### **Summary:**

In the test\_orangesRotting test case of the UI program for the LeetCode Rotten Oranges problem, the test does not properly clear the text area, leading to an inconsistent test result.

#### **Steps to Reproduce:**

Execute the test\_orangesRotting test case in the UI program for the LeetCode Rotten Oranges problem.

Observe the test results.

Expected Results:

The test should clear the text area and run with an empty text area for each test run.

#### **Actual Results:**

The test does not clear the text area between test runs, potentially leading to incorrect results.

#### **Additional Information:**

Impact:

The issue affects the reliability of the test case and may lead to incorrect results.

It may cause confusion when debugging and assessing test results.

Environment:

Operating System: Linux(x86 arch)

Programming Language: Python

Proposed Fix:

Modify the test\_orangesRotting test case to clear the text area before each test run, ensuring a clean and consistent testing environment.

Workaround:

Manually clear the text area before running the test\_orangesRotting test case.

Assigned To:

The core issue is related to the test setup and should not require changes to the algorithm or code logic.
